Job Posting:

Position: Laravel / PHP developer

Wood Street, Inc. is seeking a US based freelance Laravel / PHP developer to assist our team on a 6-12-month contract basis with potential for a full-time position on our growing development team. During the contract, you will be responsible for developing and implementing features in a new, large, Laravel based project being developed from the ground up. Other duties will include developing new features, code optimizations/enhancements and refactoring code in other existing projects as needed.

Responsibilities

- Work remotely, as part of a team, on various sized Laravel development projects.
- Understand and develop to written requirements.
- Interpret additional requirements from wireframe mockups as well as be able to work off verbal instruction.
- Write clean, readable, and performant code.
- Accomplish project deliverables while staying within the Laravel framework.

Skills and Qualifications

- Commercial level experience developing Laravel applications. No test or personal project examples please.
- Strong knowledge of the Laravel framework (3+ years) and it's features:
    - Security and Best Practices
    - Template Engine
    - MVC Architecture
    - Artisan Command Line Tool
    - Laravel OO and Modular Libraries
    - Database Migration System
    - Eloquent ORM
    - Polymorphic Relationships
    - Unit Testing Experience a Plus
- Strong knowledge of PHP 7+.
- Knowledge of object-oriented PHP programming.
- Proficient in front-end technologies, such as JavaScript, HTML5, and CSS3.
- User authentication and authorization between multiple systems, servers, and environments.
- Integration of multiple data sources and databases into singular systems. SSO experience a plus.
- Familiarity with limitations of PHP as a platform and its workarounds.

Skills and Qualifications (continued)

Creating database schemas and pre-project planning that meet project goals.

- Knowledge of building scalable applications and related design principals.
- Working in a team environment using code versioning tools such as Git.

Compensation

- For the right candidate, we offer a competitive salary based on your experience and skillset

Apply

Qualified, US candidates who are willing to work remotely (or at our office), please send your resume and work experience for consideration to resumes@woodst.com.
